1928 C.N.P. MUSICAL FESTIVAL

The official programme for the 1928 festival of the Crown's Nest Pass Sunday Schools Musical Festival will be in the hands of the printers in the job department of The Blairmore Enterprise this week end, and the gist of the programme will appear in our issue next week. The festival opens at the Blairmore opera house on Easter Monday morning and will occupy at least three full days.

ALBERTA AMATEUR BASEBALL ASSOCIATION

Calgary, Alta, 25th March, 1928.

The Sport Editor,
Blairmore Enterprise.

Dear Sir,—In accordance with the desire expressed at the last annual meeting of the Alberta Amateur Baseball Association, when the decision as to the time and place of the 1928 annual meeting was left in the hands of the president; President C. B. Cheesman has decided that the 1928 annual meeting will be held at Macleod on Wednesday, 11th April, 1928, at 3.30 p.m.

The Macleod Baseball Club have undertaken the housing of the meeting, which will convene in the Elks' Club at Macleod.

All clubs desirous of entering any section of the Alberta baseball championships in 1928 are entitled to have a representative attend this meeting.

I would remind you that following the unanimous decision of the 1927 annual meeting, the Alberta Amateur Baseball Association controls Class A baseball in addition to the strictly amateur classes, and the association has been presented this year with some very fine additional trophies for annual competition.

Yours truly,
E. D. BATTURM,
Hon. Sec-Treas.

Robert F. Lofton, alias E. F. Creighton, alias Edward Kenny, of Chicago, who was arrested by Detectives S. J. Patterson and George Gamie of the Calgary city police force on a charge of "cracking" the safe in the Louis Petrie Co. warehouse and stealing \$10,000 worth of bonds, escaped from the Pike County jail at Mississippi on May 15th of last year, while awaiting execution for the murder of Constable James Westbrook.

Lofton, under the name of Kenny, was sentenced to four years imprisonment at Prince Albert, following his plea of guilty to the Calgary burglary charge.

LEGISLATURE PROROGUES AFTER BUSY SESSION

General satisfaction is expressed by Premier Brownlee and the members of the cabinet with the work which has been done during the session of the legislature which prorogued on Wednesday, March 21st, having sat from February 2nd. A total of 79 bills were passed by the legislature during the session, eight of which were private bills and 71 public bills.

It is considered likely that a short session of the house may be called during the summer to consider a number of matters on which final action was not possible during the recent session. The premier expects to leave during the coming week for Ottawa. The satisfactory disposition of the northern railway lines and the return of the natural resources to the province will be among the problems which will engage his attention during his eastern trip.

Fernie and Michel miners have voted for a three-year agreement.

ROAD PLANS DISCUSSED

It is with satisfaction that we read of the efforts of Mr. E. Cook, of Pincher Creek, local member, towards having the Pincher Creek-Waterton Highway gravelled and we sincerely hope that his efforts will meet with success, as we feel that this road should be given preference over many other roads receiving attention. This is our most important outlet from the park and makes connections with all other main tourist highways leading to other parks in Canada. We appreciate the fact that we will have a gravelled road from Cardston this summer, but this road does not ally for any continuance from the park to other points of interest in Alberta or British Columbia and does not give us the Banff-Windermere traffic in any way. This is what we have long desired, that we be a link in the circle tour, to which we are entitled as a national park and second in attendance and registration. Then again the town of Pincher Creek is and always has been the headquarters for park business and park traffic, we are in the Pincher Creek provincial riding and we here, feel that we should have better connection with this point than with any other. —Lethbridge Herald.

THE DEVILISH GAME OF GOLF

(A Letter to the Editor of the *Baltimore Sun*)

It seems to me the time has come when the right-thinking Americans must give attention to the pernicious effects of the growing hold which golf is gaining upon the American people. Thousands of our people are now golf addicts, and their number is growing every year.

Think of the misery this wicked game is causing. Men neglect their wives and children and their business and waste their time and substance on its insidious charm.

The golf instructors are growing rich plying their wicked trade of giving lessons at the expense of their unfortunate victims, and swollen fortunes of the manufacturers of the devilish golf device increase and multiply.

Even the womanhood of the country is becoming addicted to golf, and public and private courses alike have an unhealthy influence on the minds of both young and old and is a growing cause of the desecration of the Sabbath. Men do and say things under the influence of the demon golf they would never do otherwise.

Golf makes liars of some men and causes profanity and loss of self-control. I thank the Lord that golf has never obtained a hold on me. I can play at it or let it alone.

While I am a moderate golfer, I am willing to forego the game for ever for the great good its prohibition would accomplish.

I urge that steps be taken immediately to prohibit the playing of golf on Sunday and that we organize at once with the object of adding an amendment to the Constitution of the United States to prohibit all golf except for medicinal purposes after June 30, 1928.

TALC DEPOSITS

TO BE DEVELOPED

Development of the deposits of blue and white talc which are found in the vicinity of Banff is planned during the coming season, announces H. B. Lumsden, assistant director of the development branch of the Canadian Pacific railway. Mr. Lumsden states that a road twenty miles in length will be built between Massive Siding and the deposits to make them readily accessible. The blue variety of talc, which is very rare and valuable, is used in electric insulators and gas burners, while the white sort is extensively used in the preparation of cosmetics.

ANNUAL CONVENTION ALBERTA EDUCATIONAL ASSOCIATION

The eighteenth annual convention of the Alberta Educational Association will meet in Central United church, Calgary, April 10, 11 and 12, 1928.

Any person interested in education is free to attend and may become a member by paying the membership fee of one dollar.

Reduced fares on the railway may be obtained by buying single fare tickets and asking for a standard certificate, which signed by the secretary entitles the holder to a half fare return. These tickets are good for ten days.

The speakers this year are General Sir Arthur Currie, principal and vice-chancellor of McGill University; Dr. H. T. J. Coleman, dean of arts and science and head of the department of philosophy in the University of British Columbia; Dr. M. E. Lazerte, a former PS inspector, teacher and now professor of philosophy in University of Alberta; Miss Donalds Dickie, teacher in Calgary Normal School, student of Oxford and author of several books on supplementary reading. Mr. C. C. Bremner, inspector at Macleod, will also speak, as will A. E. Hulton, B.A., art instructor in Calgary Normal School.

Two debates, on "Methods of Administration" and "Demand for Secondary Education," by well known educationists are sure to create tremendous interest, and should appeal to trustee as well as teacher.

Ask Me Another

He: "I can answer any question."
 She: "Well, what's the broad band used to keep the saddle in place on a horse's back?"
 He: "Aw, that's a cinch.—Dartmouth Jack o'Lantern."

He (seriously): "What are the last three hairs in a dog's tail called?"
 She (very seriously): "Well, truthfully, Jack, I don't know. You tell me."
 He (very, very seriously): "Why, dog hairs."—Wabash Caysman.

NEW Canadian Edition of
STUDEBAKER'S
ERSKINE SIX
\$995 f.o.b. Walkerville
Government taxes to be added

NOW for the first time a low-priced car has been developed which you can drive at 40-mile speed the day you buy it—the new Canadian Edition of the Erskine Six.

No other car in the Erskine price class is so finely built that it may be driven at 40-mile speed when new. This is a symbol of the extra years of care-free service built into this quality automobile.

Quality Throughout

Studebaker's advanced engineering is evident in every detail of the new Erskine Six. Design is scientifically sound. High quality materials are exactly tested. Production is held to precision standards hitherto found only in the most expensive cars. And finally, every Erskine Six in the course of building is checked and re-checked by hundreds of the most rigid inspections.

This new Erskine Six is the champion performer of its class—conclusively demonstrated when a stock Erskine sedan averaged better than 54 miles an hour in a 24-hour test. This set a record never equaled by any stock car in the Erskine's price class.

Bigger—More Powerful

But even these authentic facts and figures cannot sell you the story of engineering triumph represented in this new Canadian Edition of the Erskine Six. A bigger—roomier—more powerful Erskine. Comfortable—spacious—doors nearly a yard wide—rear seats 4 feet wide—52 miles an hour—nimble acceleration—thrifty of gas and oil—amplified action 4-wheel brakes. And remember this car is Studebaker built and that speaks volumes for its quality and dependability. Test it out—NOW!

The Canadian Pacific's Big Five

1—Map showing the five cities where the trains will leave and arrive.
2—Banff, the converging point of the quintette trains operated by the Canadian Pacific Railway.
3—One of the giant engines to be used for these long runs.

When the Big Five, the quintette of trains de luxe to be operated by the Canadian Pacific Railway on express schedules from the east of Canada and from Chicago this coming summer to the coast, make their initial runs, the dramatic spectacle will be presented daily of five great trains flying across the Dominion and all converging on the wonder district of the American continent, the Canadian Rockies, where snow-capped mountain peaks and beautiful valleys and lakes vie with another in attracting visitors from all parts of the United States and the rest of the world.

The key train of the quintette will be the "Trans-Canada" which will have two others, "The Imperial" and "The Toronto-Vancouver" express operating from the coast to Montreal and Toronto respectively are both year round trains except for modified schedule. Finally, there will be "The Mountaineer" and "The Soo-Pac," running out of Chicago for Vancouver, B.C. The former will start its daily run to Vancouver on June 11 and the train will commence operation from the coast to Chicago on June 15. In this run ten hours will be cut off last years figure the journey taking 73 hours as against 83 hours and fifteen minutes last year. The "Soo-Pac" will leave Chicago on June 28 until August 30, and from July 2 until August 30 in the opposite direction. Both the latter two trains consist of all sleeping cars.

Duet (Soprano and Contralto).

"Sing, Sing, Birds on The Wing" — Nutting G.

Duet (Tenor and Baritone).

"Awake" — Pellissier

Quartette (Male).

"Lead Kindly Light" — Dudley Buck

Junior Choir.

"Breathe Soft Ye Winds" — Paxton William

Empire's Smallest Island Asks for Help

From King George and Queen Mary down to the lowliest of their subjects throughout the Empire, interest has been excited by the distant and isolated island of Tristan da Cunha in the South Atlantic by the voyage of the Canadian Pacific Liner, Empire of France on its first African-American cruise in the course of which the vessel will touch at the island. Hardly one ship in a twelve-month comes anywhere near the island and the advent of one which carries with it every facility of modern luxury is an event which will certainly be unique.

The 140 inhabitants of Tristan da Cunha will have a treat in store since presents have been sent to the officers of the I. O. D. E. for their. These include timber and nails which are being sent on the recommendation of Captain S. Vint, old-time mariner who lives in Montreal and who recalls days when he sailed near the island and the inhabitants put out in boats and begged for wood and copper nails. Other gifts are books, magazines, clothing, gramophones and records and particularly a powerful radio set which will keep them in contact with the outside world. No ships can dock at the island and the Empire on her passage across the 3773 miles of ocean that separates Buenos Ayres and Cape Town will stop about half way within sight of the island and will raft to its inhabitants the gifts of the outside world. This will be done about the last week in February.

The people are self-governing and self-supporting. The men are daring seamen and clever carpenters and masons, but there is a touch of the primitive about the picturesque bullock-carts and the cottages built of huge blocks of stone. High cliffs circle the lonely island and are pierced with ravines, the walls rising like ramparts from the sea to a height of over 1,000 feet. They are topped by a central cone that stands out amid the surrounding cliffs at the base of the island. The island has only been in continual occupation since 1817, although discovered in 1506 by the Portuguese Admiral Da Cunha.

Pat was taking Professor Jones down the river in a rowboat.

"Pat," said the professor, "have you ever studied zoology?"

"No," said Pat, "I don't know nothing about it."

"Why, you've missed half your life," was the reply. Then, a little later, "Do you know anything about biology?"

"Nope," grunted Pat.

"Well, you've missed half your life," replied the professor.

Just then the boat hit a snag and upset.

"Help," sputtered the professor.

"Hey, Professor," yelled Pat, "do ye know anything about swimming?"

"No," gasped the professor.

"Then in a few moments you're gonna miss your whole life," cried Pat, as he struck for the shore.

BROWN-BANSEMER

St. Stephen's church, Calgary, was the scene of a very pretty wedding Saturday evening, when Huldah Christina Bansemer, of the staff of the Drumheller Municipal Hospital, became the bride of Mr. Paul Raymond Brown, of Drumheller, the Rev. Canon James being the officiating clergyman.

The bride, becomingly gowned in a costume of rose beige crepe with hat to match, was attended by her sister, Mrs. Frances F. MacNeill as matron of honor.

The groom was supported by Mr. Harold S. Bansemer, a brother of the bride. A reception was held at the home of Mr. and Mrs. Lewis E. Booth, Thirteenth Avenue West, Mrs. Booth receiving with the bride in a gown of blue crepe roman, after which a buffet luncheon was served.

Mr. and Mrs. Brown will reside at Drumheller.—Drumheller Review.

RODDY McDONALD IS ON KESLER'S TRAIL

DRUMHELLER, March 26.—Roddy McDonald, the well known boxer, and former Canadian middleweight champion, is anxious that his many friends in Alberta do not confuse his name with a police report on a chap of the same name, who paid a fine for parking too liberally of the cherrie cup. The original "Roddy" has been on the high seat of the water wagon for several years and has no intention of slipping from this position on the aqua prau truck. Incidentally, he is in the best shape of his Western Canada boxing career and has challenged Lew Kesler, the boy who took away Bob Fox's Canadian light-heavyweight title by the knockout route last week in Lethbridge. Roddy lost a very close decision to Kesler at Lethbridge a little over a year ago and a Kesler-McDonald scrap would be a more even battle than a Kesler-Fox bout. Roddy has no intention of retiring yet and intends to show these boys who have had the stage lately, that they have yet to learn several tricks about the rugged science of boxing.

Fred Tustian had the misfortune to get a bad cut in his hand, which has disabled him for a few days, making it necessary to get an assistant to take his place until he is able to resume work.

The final five-hundred drive of the season was held on Wednesday night of last week in the L.O.O.F. hall. There were nine tables at play. Prizes were won as follows: Ladies' first, Mrs. Mundie, of Lundbreck; gents' first, Willie Musgrave. The consolation prizes were awarded to Mrs. A. J. Snyder and Harold Snyder. After luncheon, dancing was indulged in for two hours. Music was furnished by Tustian's orchestra. Mrs. George Porter and Mrs. A. J. Snyder were on the refreshment committee.

HOW TO CARE FOR VARICOSE OR SWOLLEN VEINS

Rob Gently and Upward Towards the Heart as Blood in Veins Flows That Way

If you or any relative or friend is worried because of varicose veins, or bunions, the best advice that anyone in this world can give you is to ask your druggist for an original two-ounce bottle of Moore's Emerald Oil

(full strength) and apply night and morning to the swollen, enlarged veins. Soon you will notice that they are growing smaller and the treatment should be continued until the veins are of normal size. So penetrating and powerful is Emerald Oil that even Phlebs are quickly absorbed. Anyone who is disappointed with its use can have their money refunded.

CONFERENCE ON RESOURCES WILL BE HELD SOON

Ottawa.—A conference between representatives of the Dominion and provincial governments concerned will be summoned to meet at the close of the present parliamentary session to attempt to reach an agreement with regard to the return of the natural resources to the western provinces. This is disclosed in correspondence on the matter which was tabled in the House of Commons.

The correspondence was between Premier King, Premier J. E. Brownlee, of Alberta, and Premier John Bracken, of Manitoba. In it Premier Bracken refers to the Federal Government's "prompt and generous manner of instituting the Duncan report concerning the Maritime Provinces," and suggests regarding the western natural resources that "the time is singularly opportune for the settlement of this question by arbitration."

Replying, Premier King said: "In arranging for arbitration we can see some objection to sending the question to the privy council, and it would therefore be well that we should reach an agreement both with respect to the terms of reference for the arbitration and the tribunal to which the matter is referred. Later he suggested that a conference should be held immediately following the close of the present parliamentary session."

The correspondence with Premier Brownlee is confined to an exchange of telegrams. Premier Brownlee declares that his government is prepared "actively to renew negotiations leading to a complete settlement of the questions as soon as the present session is over." In the meantime, the Alberta Government was considering references to the privy council, but was not in position to commit itself to the position of appellant.

Union With Newfoundland

Any Proposal Would Be Welcomed By People of Canada

Ottawa.—Any representations for union between Canada and Newfoundland would receive the consideration of the Canadian Senate. This was elicited recently from the debate which was precipitated by the resolution of Senator C. E. Tanner, which declared that "in the opinion of this House, Canada should favorably consider any proposal that may be made by Newfoundland for union with the Dominion of Canada."

Speaking to his resolution, Senator Tanner declared that the Senate could not make anything in the form of a definite proposal. That must necessarily come from the authority of the country, stated the government of Canada or that of Newfoundland. But the Senate was justified in putting upon record its views in regard to public opinion in Canada. Any proposal from Newfoundland for union with Canada would be welcomed and the people of this country would be ready to sit down and talk the matter over in a friendly spirit. The Senator pointed to the community of interest between Newfoundland and the maritime provinces and to the increasing trade between the two countries. He praised Newfoundland's war effort and its loyalty to a common crown.

Sensor Tanner felt that it was desirable that the units of the empire should be consolidated "further than they are if the people of Newfoundland should desire." The senator said he would like to entertain a vision when not only Newfoundland but also the British West Indies—all units of the empire on this side of the Atlantic—would be consolidated into one great dominion.

Unity of Empire

Canberra, Australia.—Questioned in the House of Representatives regarding the recent statement of Premier J. B. M. Hertzog, of the Union of South Africa, to the effect Great Britain is involved in a war, Premier Stanley E. Bruce declared that when the King was at war all parts of the Empire were involved, although each parliament could decide the extent of any active participation.

Unemployment Less in Britain
London.—It was announced recently that, on March 12, there were 1,071,000 unemployed persons registered with the government, 22,000 less the number registered a week previous and 47,000 less the number registered March 12, 1927.

Advocates System Of Organized Marketing

Conditions Of Poultry Business Unfavorable, Says Cowichan

Victoria, B.C.—Hen No. 6 which broke all egg production records a year ago, advertised British Columbia poultry to the world and brought thousands of dollars in orders to the University of British Columbia pen, but she has merely helped to complicate the market situation.

That is the view of Captain A. B. Mathews, of the Cowichan Creamery Association, one of the largest co-operative dairy and poultry concerns in Western Canada.

"The condition of the poultry business is unsatisfactory," reported Captain Mathews. "Not only has the number of birds increased rapidly, but egg production per bird is also increasing. Hen No. 6 may be the eighth wonder of the world, but unless the boosting of excessive production is supplemented by some intelligent system of organized marketing, the 300-egg hen may be a curse to the industry rather than a blessing." It was reported at the meeting that companies shipping eggs to the eastern markets had lost approximately \$40,000 during the last few months owing to the market conditions.

Test Pulverized Coal

Will Attempt To Demonstrate Commercial Possibilities Of Fuel

Ottawa.—Development of the commercial possibilities of pulverized coal will be proceeded with immediately by the government. To test and demonstrate possibilities, the government will (a) adapt one of its test stations on the Pacific coast to utilize pulverized coal; (b) use pulverized coal in one of the government buildings in British Columbia.

In making this announcement to the House of Commons, Hon. Charles Stewart, minister of the interior, said he thought there was a bright future for pulverized fuel, especially for use on freighters. Pulverized fuel was no longer an experimental stage.

The matter was brought up on a resolution, by A. W. Neill (Independent, Comox-Alberni).

Heads Research Council

Sir Joseph Flavelle Will Be Chairman Of Research Council In Ontario

Toronto.—Sir Joseph Flavelle, prominent Toronto capitalist and philanthropist, will be chairman of the National Research Council, a creation of which legislation is now before the legislature, Premier Ferguson announced in the House.

A research council composed of university men and men interested in the various industries, including agriculture, is to be established. Persons interested in the work may contribute money to the board, and for each dollar contributed by private individuals the Government will contribute another dollar. The plan is to raise a sum of \$2,000,000 in five years, the Government paying \$200,000 a year, provided private contributions are of equal proportion.

Bicycle Teams Sold Race

Managers and Trainers Barred From Future Events In Germany

Berlin.—Berlin's 26-day bicycle race, which ended March 15, has had a sensational sequel in the revelation that the three leading teams were found guilty by the League of German Bicycle Riders of selling out to a betting ring less than six hours before the race ended.

Several managers and trainers of the teams implicated in the scandal have been definitely barred from future participation in German events.

Plague In Prison Camp

Sydney, N.S.W.—Following the murder of two white officials in the Solomon Islands last October, 170 tribesmen were rounded up and corralled in a hastily constructed camp. Word has now been received here that dysentery has broken out in the camp. Out of 40 natives affected seven have died. The magistrate to try the prisoners is now on the way from Fiji.

Will Discuss Thanksgiving Date
Ottawa.—Armistice and Thanksgiving Day should be celebrated on the same day—November 11. This is the practice advocated by E. J. Ladd, Conservative, Vancouver South, in a resolution placed on the order paper of the House. The suggestion will be discussed shortly in Parliament.

Date trees in the world total 90,000,000, according to a recent estimate.

Start For North Pole

Advance Guard For Wilkins' Expedition Begins Long Trip

Rome.—The advance guard and other equipment for the aerial expedition over the North Pole is headed for Arctic regions.

The ice breaker, City of Milan, which will be used as a mobile base by General Umberto Nobile for his dirigible flights over the Polar regions, sailed from Spezia for Kings Bay, Spitzbergen. The ship is equipped with the latest scientific instruments and carries a wireless receiving and transmitting set.

The ship is expected to reach its Northern goal before the end of April and by that time the Polar expedition daylight will have begun. Norwegian workmen are to refit the hangar at Spitzbergen, used by the dirigible Norge on its trans-Polar flight in 1926, for the Italia, General Nobile's present craft.

The Italia successfully completed a test flight of 22 hours with a full load of supplies and a complement of 21 men under General Nobile. It is now at the Baglio airport, near Milan, and is expected to start Northwest about the middle of April.

Besides hoping to discover the fabled frozen continent of the North, Wilkins intends to find suitable locations for weather observing stations.

WILL CENTRALIZE RESEARCH WORK AT THE CAPITAL

Ottawa.—Centralized industrial research, made possible by the decision of the Dominion Government to establish national research laboratories at Ottawa, will be of distinct benefit to Canadian universities, as well as to Canadian industries.

Co-operating with the National Research Council, the universities have for the past ten years voluntarily given over their laboratories and their staffs to investigations outside the strict limits of academic research. The step finally decided upon at Ottawa, on the instant representation of the National Research Council, means that these facilities will now more be liberated for the service of pure science.

The council will continue the bursaries and scholarships with which, since its creation it has stimulated the training of research specialists, to supplement foreign-trained experts in Canadian industries. The fitting of scientists for research work is of the utmost importance to Canada, whose industries are still in an infant stage of development, it is pointed out.

The National Research Council has awarded 44 scholarships, as the result of which 155 Canadians complete their training in their own country, almost all of them finding employment in Canada. Before the inauguration of these awards it was necessary for the Canadian student to go abroad to complete his training, with the result that he usually found employment abroad and was lost to his own country. American institutions of learning give 2,000 such scholarships annually, the majority of which are open to Canadian students.

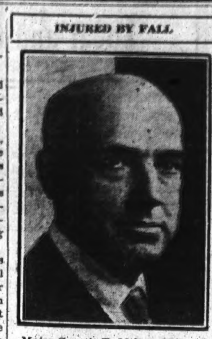

One of the great needs of today is an increased number of such scholarships, so that Canadian universities may maintain graduate schools for training in science and research of a sufficiently high standard to eliminate the necessity of the most brilliant graduate going abroad to complete his education and possibly taking his valuable knowledge permanently out of the Dominion. Such graduate schools will provide the technicians required by the universities and the government service, as well as the national industries.

British Settlers for Canada

A good example of the type of British farm settlers now arriving in Canada can be seen from the above photo taken on the concourse of the Windsor Street Station, at Montreal. This group, which forms part of the 400 settlers who arrived recently on the S.S. Montclair, are the first contingent this season of British farm laborers brought out under the auspices of the Canadian Pacific Railway Colonization Department.

They possess a thorough farming training, therefore being well equipped for the duties they are to take up in Ontario, where farms have already been arranged for them by the government.

Wants To Explore Northwest By Plane

Toronto Man Makes Application To Department Of Interior

Ottawa.—An ultra-modern mining application made to the department of the interior by Col. Cyril D. H. Alpine, of Toronto, said to be acting for the Lindsey interests, asks for the right to explore by hydroplane the northwest territories north of latitude 60, and at the same time to be given the exclusive right for a limited time to stake mining claims in that area.

The applicants pointed out that it would bring into review the policy of the government in co-operating with private capital in the exploration of extremely remote territories which for the present is beyond the reach of the ordinary prospector. The syndicate would agree to supply the department with air view maps and other information gathered as the exploration was carried on.

No decision has yet been given by the department but it is understood that a measure of the request may be granted. Cost of the exploration would be about \$200,000.

Flies Over London

Afghan Monarch Views World's Metropolis From The Air

London.—The first royal aeroplane tour over London on record was successfully carried out by King Amanullah, of Afghanistan, flew in a large Imperial Airways liner over the city starting from Croydon and returning there after a swing through the air taking in the Crystal Palace, the Tower Bridge, St. Paul's, Westminster, Abbey, Buckingham Palace, Chelsea and the southwest London district.

The Afghan monarch appeared intensely interested in the excursion and moved about in the plane viewing the various scenes through binoculars.

Smuggling Conspiracy

London.—Reports that Scotland Yard has unearthed a mysterious arms smuggling conspiracy seeking to provide arms for Irish republicans are published in the Evening Standard. Scotland Yard believes the weapons were smuggled into London for the purpose of arming companies of an Irish republican army, says the newspaper, adding that detectives have estimated that there are 100 Irish smugglers in London engaged in an illicit trade in revolvers and automatic pistols.

Manitoba Flight Abandoned
Winnipeg.—Word was received here indicating that the proposed test flight to Northern Manitoba of Commander Richard E. Byrd's South Pole plane has been definitely abandoned.

British Medical Men Coming To Canada

Arrangements Being Made For Convention At Winnipeg In 1929

Toronto, Ont.—In connection with the proposed meeting of the British Medical Association in Winnipeg, Man., in 1929, a program is already being arranged whereby the visiting medical men will be enabled to see as much of the Dominion as possible before they return to Great Britain. Dr. T. C. Routley, Toronto, secretary of the Canadian Medical Association, is sailing at the end of this month for the Old Country to arrange details of the 1929 meeting of the British Medical Association in Winnipeg, which was expected to be the greatest gathering of doctors ever held in the Empire.

This will be the third meeting of the British Medical Association outside of the British Isles, both of the previous meetings having been held in Canada, in Montreal in 1907, and in Toronto in 1906.

After a week in Winnipeg, the British doctors will be taken through the Rockies to the Pacific Coast, and then again by sea to England. Thus they will see the prairies, the mountains and the wealth of British Columbia. They then will be taken through the Maritime Provinces.

Would Not Interfere With Ocean Flying

British Air Ministry Thinks Legislation Would Be Unwise

London.—A stand against Government supervision of trans-Atlantic flying was taken in the House of Commons by the air minister, Sir Samuel Hoare. The minister told the Commons that in his opinion it would be unwise for the department to obtain legislative powers of that kind.

He added that while he agreed in the advisability of not attempting such flights until better qualified machines are available, he thought formidable difficulties would be found to stand in the way of any attempt to control by the government.

His statement came in reply to suggestions that the government impose some sort of control on people desiring to fly across the Atlantic to be sure that they possessed adequate knowledge of the air and navigation and property equipped machines.

Given Free Hand

Alberta Cabinet Can Sell Government-Owned Railways

Edmonton.—Premier Brownlee and the cabinet were given a free hand in future negotiations to sell the provincial government-owned railways at a session of the Alberta legislature. Premier Brownlee will probably leave for the East at an early date.

The premier presented figures showing a vast improvement attained in revenues by the A. and G.V. and the E.D. and B.C. lines for the first two months of 1928, over the corresponding period of 1927.

It is expected a summer session will be called if the railway situation is to be considered.

NATIONS FROWN ON DISARMAMENT PLAN OF SOVIETS

Geneva, Switzerland.—Twenty-two of the 25 countries represented on the preparatory committee for a disarmament conference are lined up against the Soviet plan for immediate complete disarmament.

Hugh S. Gibson, the United States; Calixto Whitmarsh, Cuba; Baron Louis Jagomayns, Belgium; Jonker Rutgers, Holland; E. Heening, Sweden; M. Sokal, Poland, and M. Markovitch, Yugoslavia, added their criticisms to those of Lord Cusheend, making the Russian defeat overwhelming.

London.—The Evening News, commenting on the speech of Lord Cusheend, British delegate at Geneva, expressing profound doubt of the Russian scheme of complete disarmament being possible under present conditions, says it is a real treat to see whistling through the League of Nations council chamber for once not a bouquet but a commendably heavy and well-aimed brickbat. "Lord Cusheend deserves the hands of the civilized world for his judicious and skillful use of his strong right arm," The News says.

The Evening Star editorially says if the League of Nations could be convinced of Russia's good faith the Soviet peace proposals might be assured a friendly hearing.

DIFFICULTY OF MAKING TARIFF TO PLEASE ALL

Ottawa.—Budget changes to the tariff on woollens brought sharp discussion in the House. Conservatives attacked the changes, saying they were inspired by English-woollen interests.

The tariff, Hon. R. B. Bennett, opposition leader, charged, seemed to have been moulded by Huddellfield and Bradford rather than by Canadians for Canadians. Hon. Guthrie further expressed resentment at what he termed the "interference of Yorkshire mill men."

Hon. James A. Robb, minister of finance, remarked that there were instances where Canadian manufacturers had made representations to the British Government through the Canadian Chamber of Commerce in London. Representations of a similar nature had been made to the governments of South Africa, New Zealand and Australia, in an effort to obtain privileges in these markets.

At this very moment, said Mr. Robb, representatives of Canadian agricultural interests were at Washington before the United States tariff commission, in an effort to obtain importation into the United States of milk and cream. The minister said that the discussion proved the difficulty of making a tariff which would suit everybody in Canada. The debate tonight had shown that the woollen industry was not, over prosperous, but the T.A.B. in considering how best to help the woollen manufacturers had before them the alternatives of raising the duty on the finished fabric or giving greater concessions on the raw material. Mr. Robb believed that the course taken, the latter one, would commend itself to the people of Canada.

Conscription Of Wealth

Manitoba Command Of Canadian Legion Endorses Resolution

Winnipeg.—Endorsement of the resolution that property as well as men be conscripted in time of war was given by the third annual convention of the Manitoba Command of the Canadian Legion, British Empire Service League, here. A recommendation that this resolution be submitted to the next convention of the British Service League, to be held in Australia in 1930, also passed the convention.

Reaffirmation was given to a resolution on immigration, which recommended that the government put into effect the principle of the quota system from countries other than those of the British Empire and that at least 70 per cent. of all immigration be of British stock.

Lieut. Col. Ralph H. Webb, Winnipeg, was re-elected president of the Manitoba command, and E. B. Spencer, of Morden, Man., was elected Dominion representative.

Power Contract Closed

Manitoba Company Will Supply Government With 30,000 Horsepower Yearly

Winnipeg.—The Manitoba Power Company has closed a contract with the provincial government to supply 30,000 horsepower annually from its site at Seven Sisters Falls. The contract will operate over a period of 26 years at the end of which provision is made whereby the government can take over the private plant as a publicly owned utility.

According to Hon. W. J. Major, Attorney-General, the power will be sold to the government at a rate of \$13.80 per horse power. This figure, he claimed, was the most favorable received anywhere on the continent.

Alberta Legislature Prorogued
Edmonton.—After a session which lasted seven weeks, the Alberta Legislature was prorogued by Lieut. Governor Egbert. Before prorogation His Honor assented to 81 bills. The final sitting was devoted to a debate on the railway situation—'which Premier Brownlee previously announced may be made the object of a special midsummer session—and the clearing order paper of three or four bills which were given final reading.

Capture Deer In Vancouver
Vancouver, B.C.—While walking along Broadway Street in the western end of the city, two men captured a full-grown deer when it dashed toward them. A number of dogs from nearby residences were in eager pursuit of the animal. Where the deer came from is a mystery. It was injured and had apparently travelled considerable distance.

HEALTH

The Greatest Asset You and Your Family Possess. Why Neglect IT? ILL HEALTH—Your Greatest Liability—WHY CULTIVATE IT? Wampole's Tasteless Preparation of Cod Liver Oil will safeguard you and your children against the danger signals of ill-health. The greatest medical authorities in the world advocate the use of PURE COD LIVER OIL for the treatment of wasting diseases, particularly where there is a tendency to chest weakness or lung trouble. It is not only pleasant to the taste, but easily digested and rapidly assimilated. It restores the worn out cells, creates warmth, and renewed energy, and increases weight more rapidly than any other remedy. FOR THAT STUBBORN COUGH IT HAS NO EQUAL.

For convalescents, weak or growing children, a marked difference can be noticed after the use of one bottle.
